

“New Skills for a Fast Growing Career As a Dental Assistant In just 10 Saturdays”

Did you know the job outlook for dental assistants is excellent? Employment in this field is expected to grow much faster than the average for all occupations through 2016. **The Bureau of Labor Statistics predicts that it will be the third fastest growing occupation for which a college degree isn't required.**

A career of helping people improve their dental health is rewarding and enormously satisfying. No two days are the same and your job continuously renews itself. **Dental assisting is a career that will always be in demand and in need of enthusiastic, trained and caring individuals. This could be you...couldn't it!?**

Dear Prospective Students:

Our course is designed to give students maximum **“hands-on” training in a real dental office.** During class the dental office will be closed in order to provide a stress-free environment for our students. You are not expected to know everything! You are just expected to work hard, study well, and learn!

The teaching is stimulating, fast paced, and relies heavily on your participation. The largest size of each group will be one instructor per 10 students. An excellent textbook is used (yes, there are reading assignments and homework) so classroom time can be spent learning the “hands-on” information.

Our program is currently taught in two locations in Ohio and one location in Indianapolis, Indiana and is registered with the Indiana Commission on Prop. Education. Our central Ohio school is located in Columbus and our southwest Ohio school is located in Lebanon. Both schools are registered by the Ohio Board of Career Colleges and Schools.

Our Dental Assisting classes will begin on the date listed below:

Saturday, September 11th, 2010 @ Dental Assistant Pro

Call 513-515-6611 for Information

11020 E. 10th Street

Indianapolis, Indiana 46229

Indiana Commission on Prop. Education #AC-0185

We have scheduled an *Open House* for each of our schools to answer any questions you may have about our course and give a brief tour of the facility.

Do not miss these opportunities!

A Comparison of Schools and Jobs

To Help You Make Your Decision...

Are you seeking a new career opportunity?...Or maybe the kids are in school and you want a career to bring in some extra money... Here's a comparison of your school choices:

School choices	Time	Cost	Graduate job options
University or College for a Bachelor of Arts degree (120 credit hours)	4 years (1,460 days)	\$25,000 Plus	Entry level position
Community College for an Associates Degree (60 hours)	2 years (730 days)	\$7,900 Plus	Entry level assistant position
Dental Assisting School Dental Assistant Pro (80 classroom hours)	10 Saturdays (8:00-5:00)	\$2,450	Entry level Dental Assistant

If you want to include some letters after your name (like B.A.), you will need to spend four years in school and spend in excess of \$25,000! And then you get to go out and look for a job.

If you decide to go to a junior/community college instead, you can cut down on the cost to a little less than \$8,000, *but you still have to attend school Monday through Friday for about two years!* And then you get to go out and look for a job.

If what you want is hands-on training, a chance for a rewarding job you can be proud of, and a paycheck --- Contact our Dental Assisting School! There is really no comparison in time or money required.

What Are the Advantages of a Dental Assisting Career?

Variety: Dental assistants have one of the most diverse and interesting of all positions in a dental office. Dental assisting is a **challenging and rewarding career**, demanding versatility and a willingness to assume responsibility for many different tasks.

Flexibility: Since **dental assistants are in demand**, career options include both full-time and part-time positions

Excellent working conditions: Dental offices are interesting, pleasant, people-oriented environments in which to work.

Personal satisfaction: Dental assisting involves people contact, and with this personal interaction comes the personal satisfaction of knowing you've really helped someone by helping to provide a valuable health service.

A career of helping people improve their dental health will be rewarding and enormously satisfying for you. No two days will ever be the same and your job will continuously renew itself as you are given more responsibilities and patient services. Dental assisting is a career that will always be in demand and in need of enthusiastic, trained and caring individuals.

Please read over the enclosed information and plan on attending an Open House for a school in your area!
Remember: We have schools currently located in Columbus, Ohio, Lebanon, Ohio and Indianapolis, Indiana.

Director Dental Assistant Pro

Dental Assistant Pro

About our course:

The job opportunities for trained dental assistants are quite good in today's marketplace. While no one can guarantee job placement, the dental profession is currently facing a shortage of trained assistants. If one examines the want ads there are many for Dental Assistants.

Following your training in this ten-week course, you will have the confidence and skills necessary to apply for these positions. Along with your certificate, we will give you a summary of your training experience.

Dental Assistant Pro is an Indiana State Department of Health approved dental radiography program.

Part of your training will involve the *Job Interview* itself, how to prepare for it, how to dress, what to say, etc. Many times jobs are lost during the first five minutes of the interview. We feel it is important to train you in this area so that you will stand out from the rest of those competing for that position.

Additionally, we anticipate that many doctors will call our office asking for a list of our recent student graduates. We will also inform our current class of any doctors needing Dental Assistants so that they may apply directly for the position. We think that many of our students will obtain jobs as dental assistants even before finishing the course!

The starting **pay scale for experienced dental assistants is considerably higher than non-experienced.** Most offices will not even consider anyone without experience. We are often asked what a graduate from our course can expect to make in their first job. The answer depends on where the office is located. Offices in a metropolitan area generally pay higher salaries than those in suburban areas. Graduates of our course can expect to start above the pay scale of those with no experience, but less than experienced assistants. (This is good news, as your experience and skills develop with time on the job)
